

Australia's Geography – Travel Writer Assignment

Before you get started, complete this Milestone related question.

Uluru rises spectacularly above the flat landscape of central Australia like a feature from another planet. Uluru is 1,141 feet high and 5.6 miles around at its base. Incredibly, it also is a monolith—a single stone or rock—the largest on the earth. Uluru's sandstone changes color depending on the time of day. It is most spectacular at sunset when it may appear deep red. Uluru is sacred to the Aborigines. It is adorned with paintings, and the rock is mentioned in many Aboriginal legends.

1. What is the most unusual thing about Uluru?
 - A. It is a monolith.
 - B. It has two names.
 - C. It is 1,141 feet high.
 - D. It is 5.6 miles around at its base.
2. Which of the following statements about Uluru is TRUE?
 - A. It is made of granite.
 - B. It is sacred to the British colonizers.
 - C. It is the largest monolith on the earth.
 - D. It is most spectacular at sunrise when it appears deep red.

TRAVEL Writer

It is your job to pretend to be a travel writer who is writing about a trip to Australia

Follow the steps below to make sure you complete the travel writing assignment properly.

1. You must include *AT LEAST* 2 different entries describing trips to Australia's 4 big features – the Great Barrier Reef, the Coral Sea, Ayers Rock, and the Great Victoria desert
2. Your entries must have a lot of descriptions and you must describe the following facts about Australia's geography
 - Location
 - Climate
 - Resources
 - Where People Live
 - How People Trade
3. Be creative and as detailed as possible! This is your project. Feel free to include pictures and extra facts about Australia! Don't forget this should be written as a journal entry with dates for each entry. These entries should be so descriptive that others can picture what you did and saw during your travels.

BOOK VOYAGE!!
